- Fun Game just 1 Tap Play
- Up To 35 Level
- Share Button
- And Many More Again

This File Includes

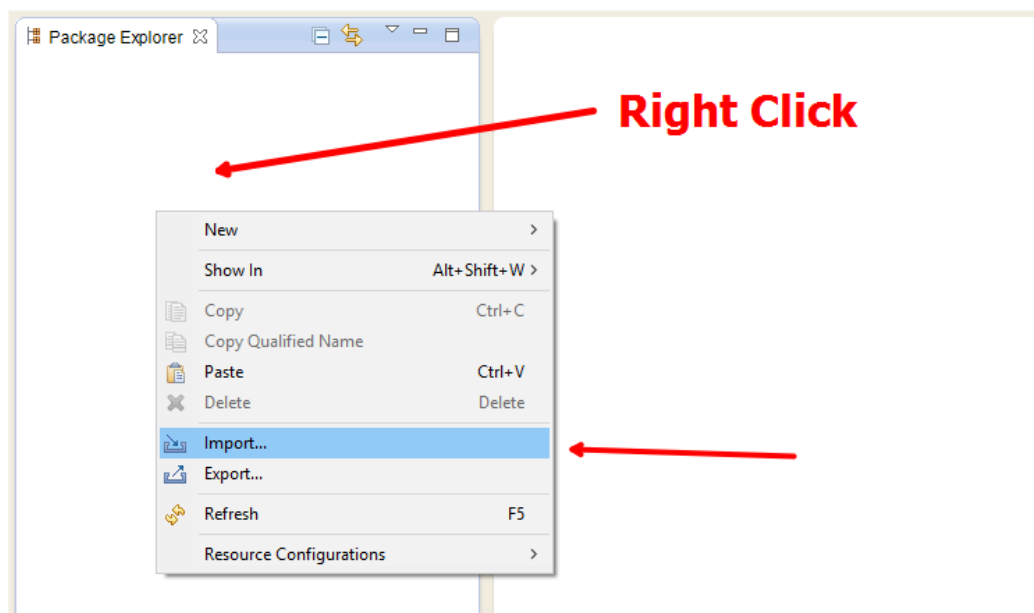

- Falling Ball Eclipse
- PNG Files (Game Sprite + Icon Game)
- Sounds (Gameplay Music , Main Menu , Fail , Destroyed , Tap Sounds)
- Falling Ball.bbdoc (Buildbox Template)

How To Setup Falling Ball on Eclipse

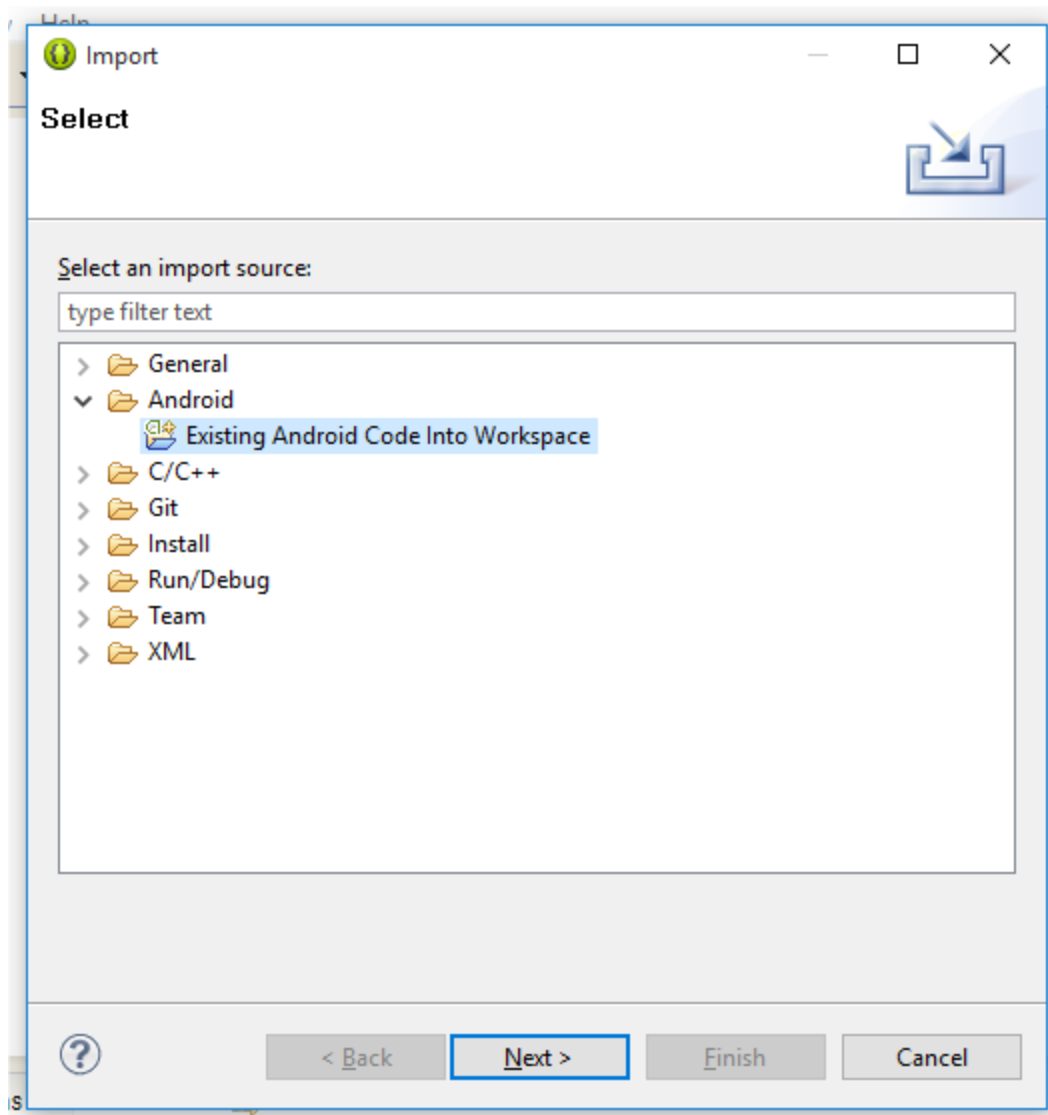

To setup this game is really simple and you can do this easily but still must do more for that , if you are newbie and don't understand how to setup this game on eclipse , just follow my instructions below :

How To Import Eclipse Project

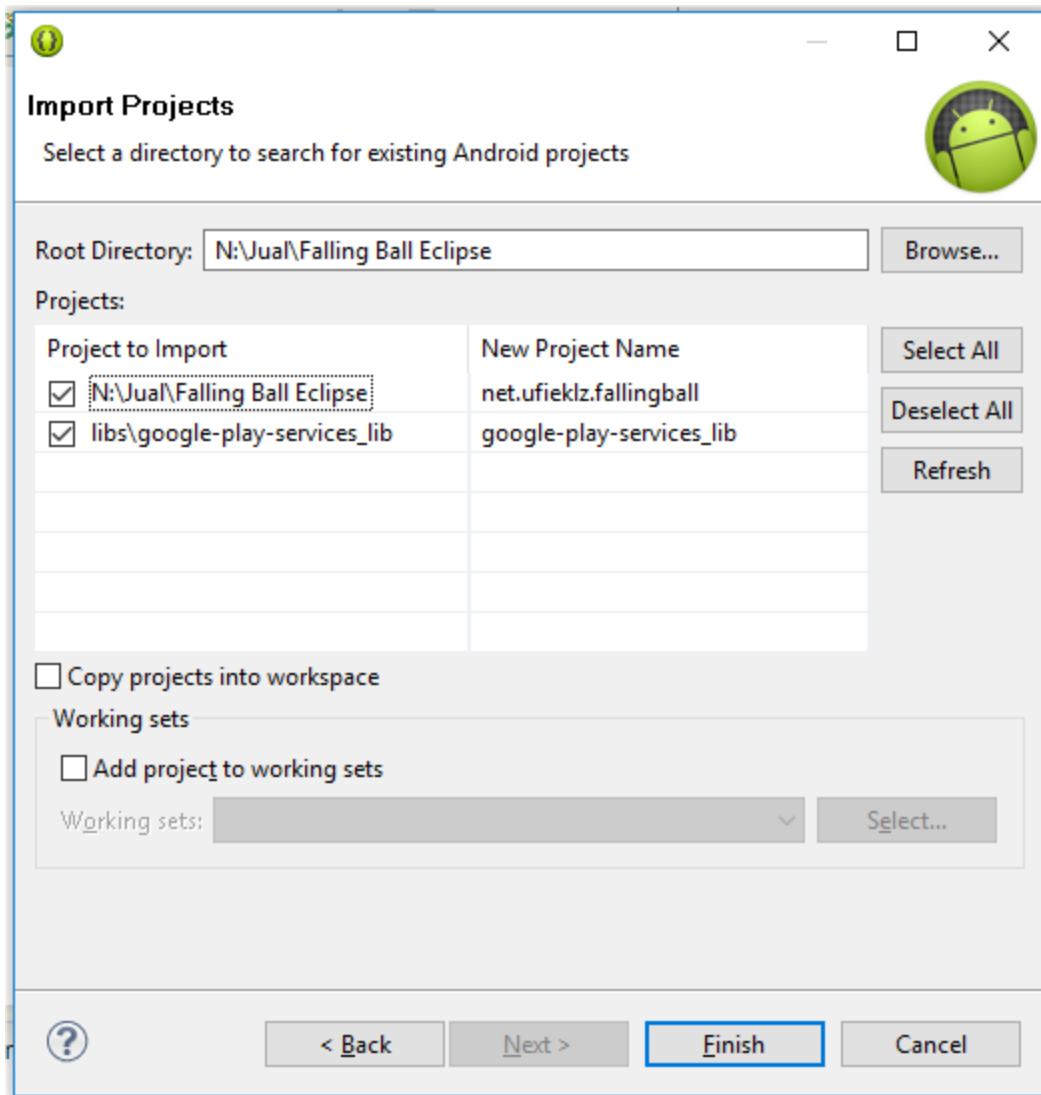

1. Open You Eclipse Software
2. Right Click on Left bar or go to File > Import and an Import Windos Should pop Up

3. Select "Android" as the Import Source and double click the "Existing Android Source Code Into Workspace" field.

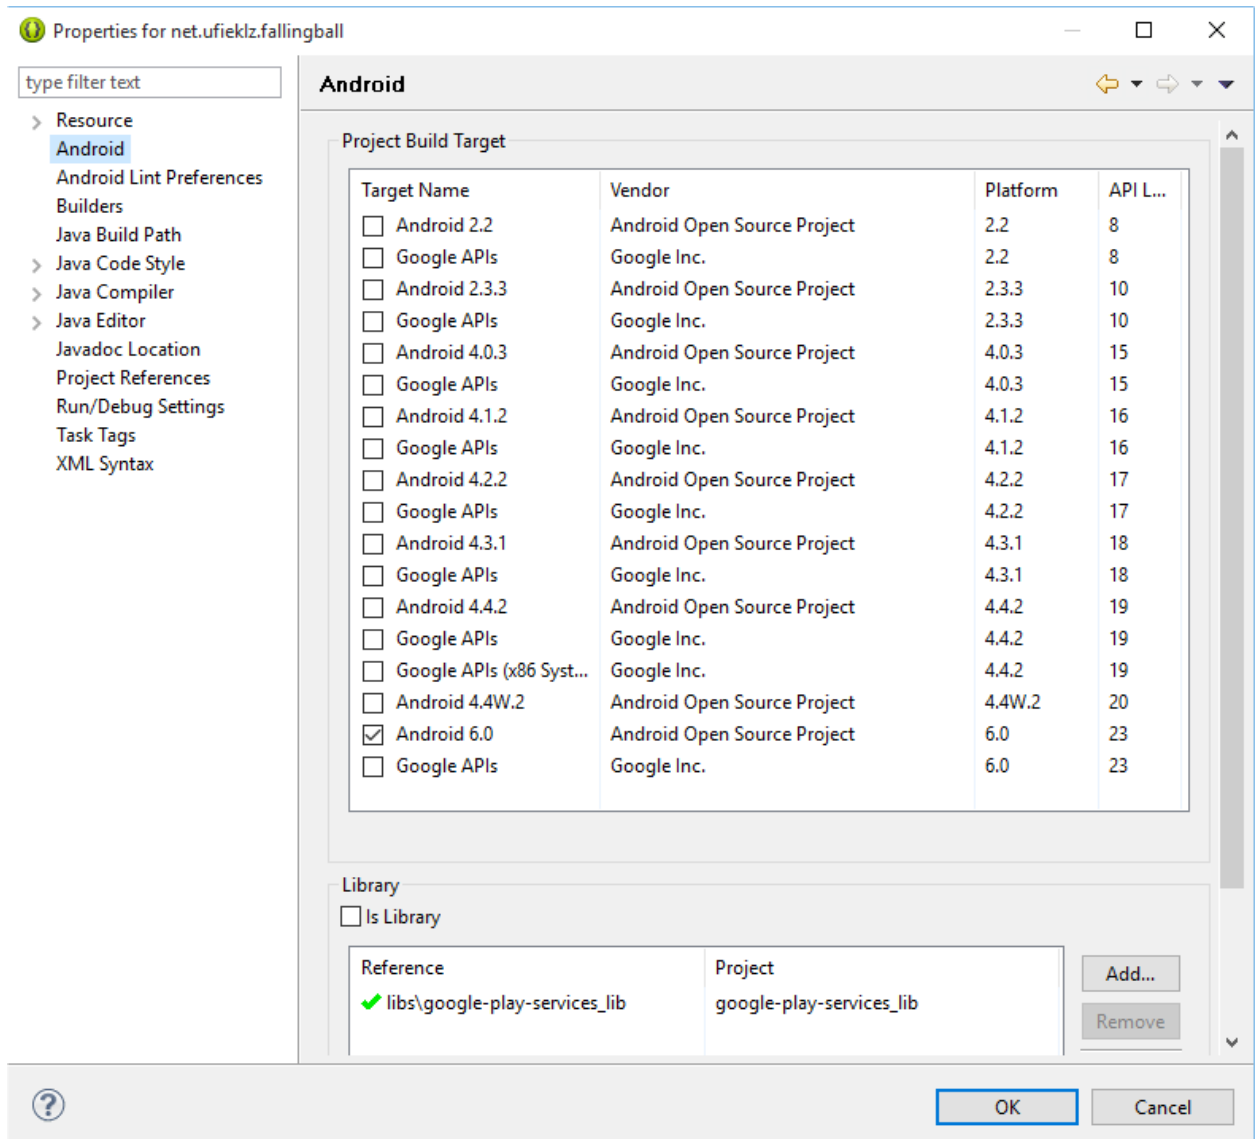

4. In the next window click the Browse button at the top. Browse to the Falling Ball folder and click ok.
5. Then make sure you have the selection as shown below.

6. Click 'Finish' & let Eclipse import the project.
7. You should now be ready to customize your source code

If you still have errors make sure you have your google play services libraries imported. If you want to add them again just incase follow the steps below.

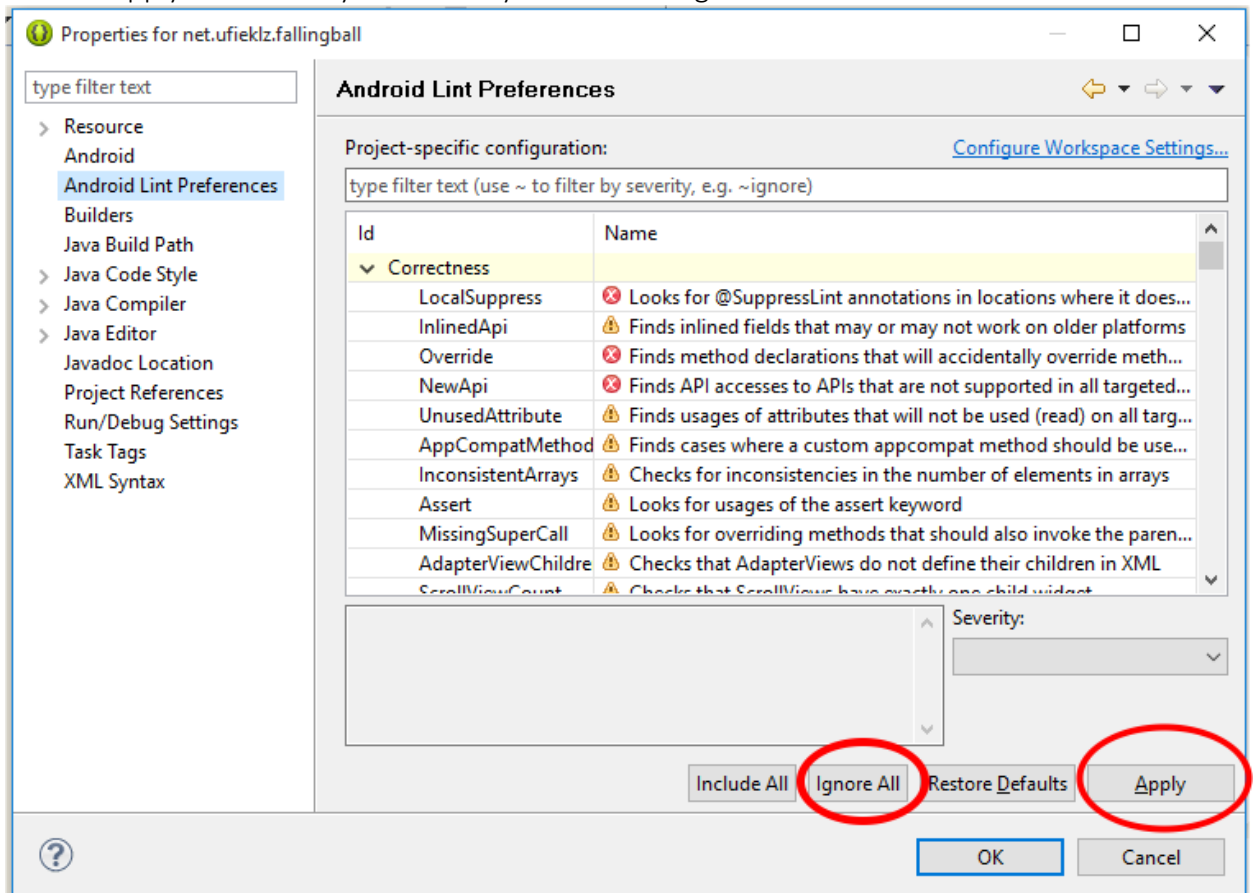

1. Right click on the project in the Project Explorer and hit the 'Properties' button
2. A new window will pop up, on the left side there are a bunch of tabs.
3. Click android and make sure you have the google play services libraries added
4. It should look like this.

5. If there is none added, click Add and then simply add your google play services lib from there and click 'Apply' and 'Ok'.
6. Your code will not have any errors after this point.
7. If you do please contact support.

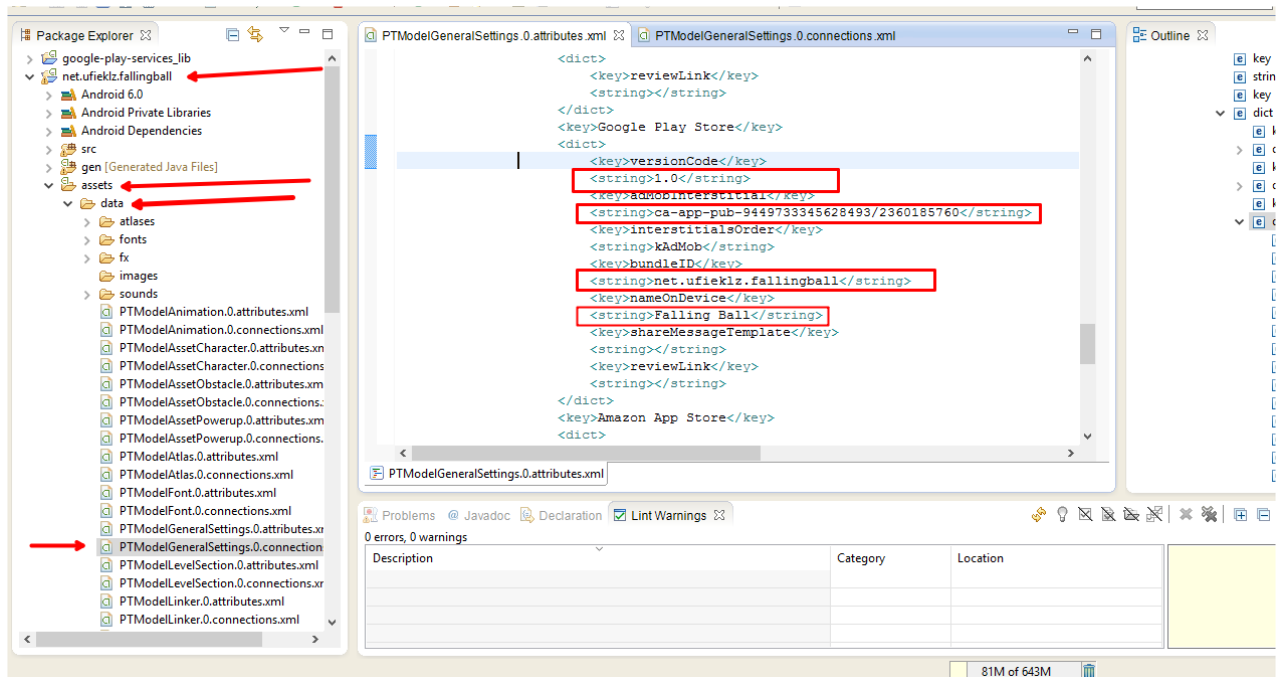

Getting Rid of Errors

1. Right click Falling Ball directory in eclipse > click properties. New pop will open.
2. Select android Lint preferences > click ignore all.
3. Click on apply button and you are ready to customise game code.

Change Version Code , Bundle ID , Name On Device and Admob Interstitial

1. In your project go to the Assets folder
2. Under Assets, go to Data and then open PTModelGeneralSettings.0.attributes.xml
3. Replace the Marked Selections , for Version Code , Bundle ID , NOD and Admob Interstitial Only .

Changing Game Icon and Splash Screen

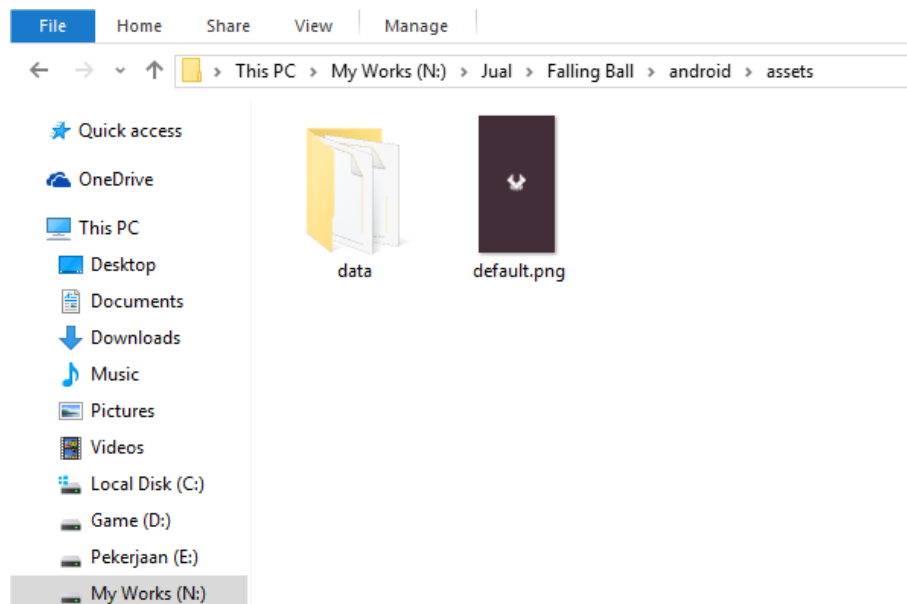

Change Game Icon

1. Go To Project Folder > Res > Drawable
2. And Replace the Icon.png

Change Splash Screen

1. Got To Project Folder > Assets
2. And Replace Default.png

Change Game Assets

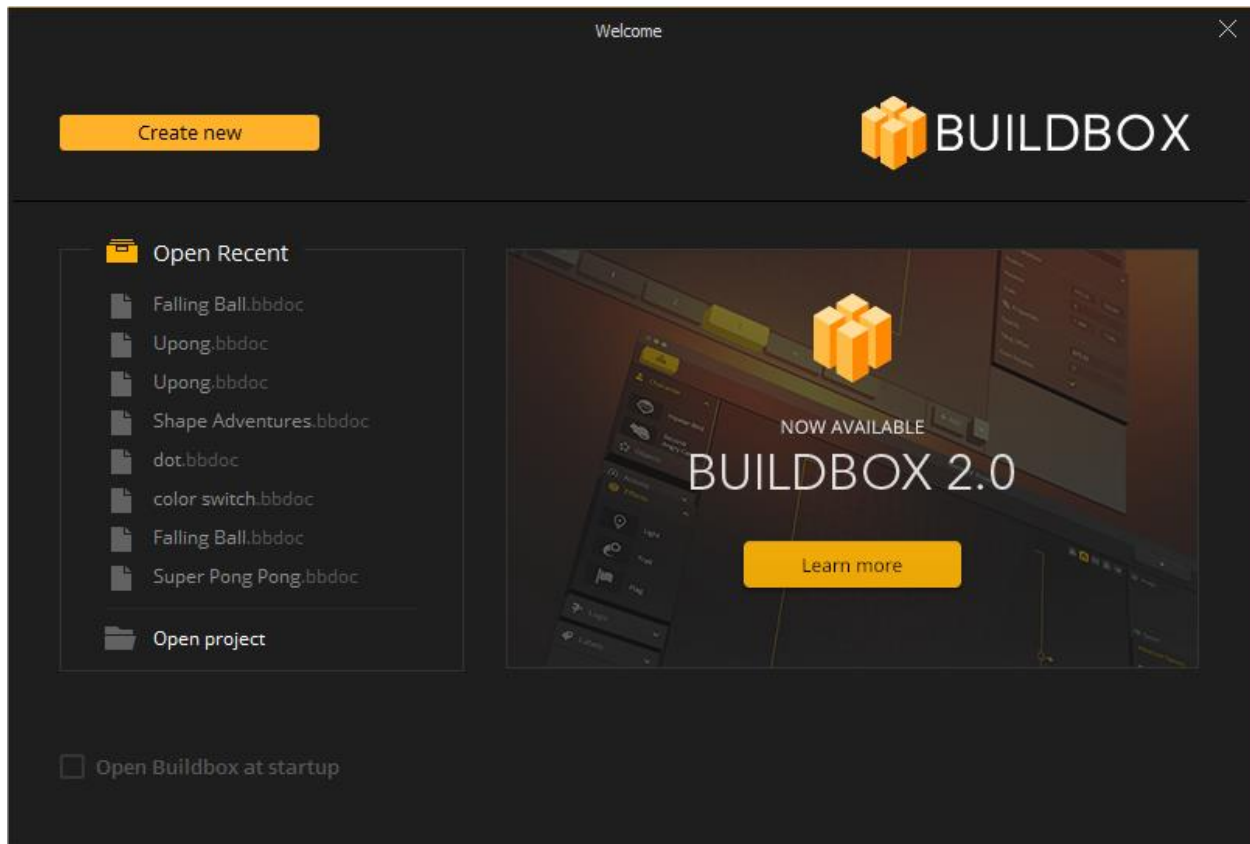

1. Go to Your Project > Assets > Data
2. There are 2 folders you need to work with.

 atlases	30-09-2015 23:10	File folder	
 fonts	30-09-2015 23:10	File folder	
 fx	30-09-2015 23:10	File folder	
 sounds	30-09-2015 23:10	File folder	
 PTModelAnimation.0.xml	30-09-2015 23:09	XML Document	5 KB
 PTModelAssetCharacter.0.xml	30-09-2015 23:09	XML Document	3 KB
 PTModelAssetObstacle.0.xml	30-09-2015 23:09	XML Document	12 KB
 PTModelAtlas.0.xml	30-09-2015 23:09	XML Document	11 KB
 PTModelFont.0.xml	30-09-2015 23:09	XML Document	4 KB
 PTModelGeneralSettings.0.xml	30-09-2015 23:19	XML Document	8 KB
 PTModelLevelSection.0.xml	30-09-2015 23:09	XML Document	6 KB
 PTModelLinker.0.xml	30-09-2015 23:09	XML Document	1 KB
 PTModelObjectAssetCharacter.0.xml	30-09-2015 23:09	XML Document	2 KB
 PTModelObjectAssetTrail.0.xml	30-09-2015 23:09	XML Document	2 KB
 PTModelObjectAssetUnit.0.xml	30-09-2015 23:09	XML Document	75 KB
 PTModelObjectBackground.0.xml	30-09-2015 23:09	XML Document	3 KB
 PTModelObjectButton.0.xml	30-09-2015 23:09	XML Document	16 KB

3. **Atlases**, which contains the image assets. I recommend using illustrator or photoshop and simply make your graphics in the atlas and replace the png with the one in the data folder. *(NOTE: Do not change name of any file. Just change the assets and save with the same name.)*
4. **Sounds**, here all you need to do is replace the mp3 background music file with your own

How To Setup Falling Ball on Buildbox

in this part you will learn how to setting this game on buildbox , this part is only show you how to **change Bundle ID , Change Version , change Admob Interstitial , change icon**, For Another Tutorial you must learn alone on youtube . There are many Videos There .

Download Buildbox

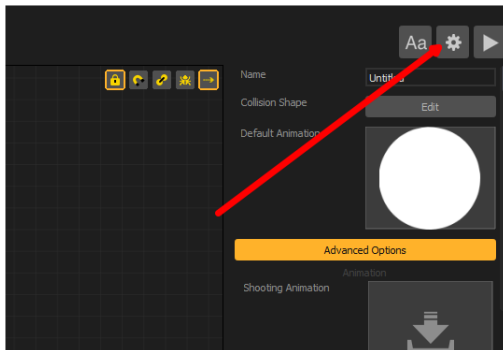

If you don't have this software you can download from <http://buildbox.com/> , Download it and install then request for 30 Days Free trial software if you want to edit this file

Open Project on Buildbox

1. Open Your Buildbox Software
2. Then Click On Open Project and Choose **File.bbdoc file**
3. And your project should opened

Change Project Settings

1. Go to Right sidebar and click on gear Icon

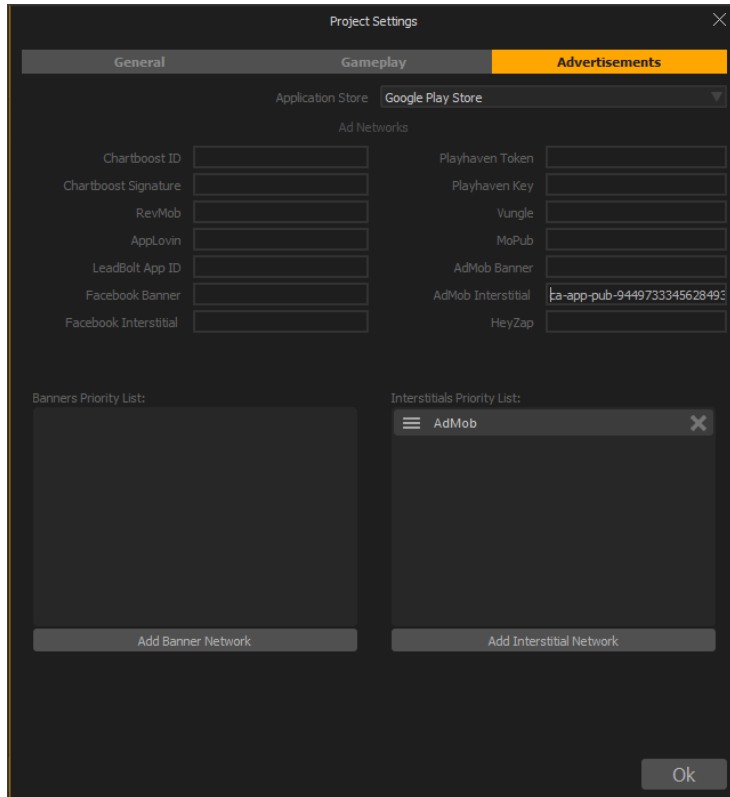

2. Then On General Tab you can Change your Project Settings , For change the Icon you must **DRAG AND DROP YOUR IMAGE** to the Box , for another you can setting up as you want , like bundle id , name , game version , name on device and more

Change Admob Interstitial ID

1. Go To Right Sidebar and click on Gear Icon
2. Go to Advertiser Tab , Change Application Store to Google Play
3. Then Change the Admob Interstitial ID

Thank You Again
